Handheld US Adds Imager Option to M3 Mobile Rugged Handheld Computer

Rugged mobile computer now reads 2-D barcodes and postal codes

CORVALLIS, Ore.—Dec. 9, 2008—Handheld US expanded the versatility of the super slim, rugged M3 Mobile PDA today by introducing an optional integrated imager. This new option extends the functionality of the M3 Mobile with the ability to read two-dimensional barcodes and symbols as well as the more common linear barcode types.

The full-featured M3 Mobile rugged mobile computer comes with advanced features such as WLAN, Bluetooth, camera, integrated GSM/EDGE cellular capabilities and GPS. The M3 Mobile weighs only 9 ounces, is IP64 rated and can handle extreme temperatures and multiple drops from 5 feet.

“The M3 Mobile is a rugged, full-featured unit that customers can depend on,” said Dale Kyle, president of Handheld US. “The addition of the 2D bar code scanner extends its value into more applications and allows us to offer it to an even wider audience.”

The M3 Mobile with the imager is available immediately.

About Handheld:
